### INRIKES OMFLYTTNING KOMMUNBLOCKSVIS 1961<sup>1</sup>

#### Internal migration

Statistiken över den inrikes omflyttningen är fr. o. m. 1961 baserad på flyttningsbetyg som utvisar flyttning mellan församlingar eller inom församling mellan skilda kommuner. På flyttningsbetyget upptas uppgifter om den flyttandes kön och ålder. Uppgift om civilstånd saknas däremot.

Tillgången till flyttningsbetygen har gjort det möjligt att framställa en detaljerad flyttningssstatistik. För år 1961 har centralbyrån redan publicerat en del uppgifter i Folkmängdens förändringar 1961 (SOS).

De i flyttningsbetygen ingående uppgifterna finns sammanställda i magnetband. Ett maskinprogram föreligger som gör det möjligt att för en enskild kommun redovisa från vilka kommuner de inflyttande kommit och till vilka kommuner de flyttande gått. Sådan statistik kan erhållas mot viss ersättning genom centralbyråns statistiktjänst. SCB har i viss utsträckning för åren 1962 och 1963 levererat sådan statistik i form av maskinlistor.

År 1964 fastställde Kungl. Maj:t kommunblocksindelningen. Som komplettering till den omnämnda flyttningssstatistiken för år 1961 redovisas i föreliggande meddelande flyttningssstatistik för kommunblocken.

#### Summary

From 1961 the statistics of internal migration are based on the certificates of changes of domicile. These certificates among other things contain information about in- and out-parishes as well as about sex and age of the migrant.

The migrants are in this report distributed in respect to co-operating communes. Such a group of communes consist of a number of the present parishes. The whole country is divided in 282 regions, each one a co-operating commune.

<sup>1</sup> Definitiva resultat. Någon ytterligare publicering av innehållet i detta SM planeras ej av SCB. Statistiken är nystartad.
