#### TABELLFÖRTECKNING

I tabell 1a redovisas månatliga indextal från januari 1970 till november 1972 för industrins leveranser branschvis.

I tabell 1b redovisas exportandelen av leveranserna från januari 1971 till november 1972 i procent.

I tabell 2a redovisas månatliga indextal från januari 1970 till november 1972 för industrins ordergång branschvis.

I tabell 2b redovisas exportandelen av ordergången från januari 1971 till november 1972 i procent.

I tabell 3a redovisas månatliga indextal från 31.1.1970 till 30.11.1972 för industrins orderstock vid varje månads utgång branschvis.

I tabell 3b redovisas exportandelen av orderstocken från 31.1.1971 till 30.11.1972 i procent.

I tabell 4 redovisas orderstockens varaktighet i antal leveransmånader. Leveranserna under de kommande månaderna antas härvid vara lika med leveranserna samma månader ett år tidigare multiplicerat med en omräkningsfaktor. Denna omräkningsfaktor erhålls genom att leveransvärdet under de närmaste gångna tre månaderna divideras med leveransvärdet för samma period ett år tidigare. Denna omräkningsfaktor används för att någorlunda korrigera för trenden i leveransutvecklingen.

I tabell 5 redovisas det uppräknade värdet av de imputerade uppgifterna i procent av det totala uppräknade värdet för leveranser, ordergång och orderstock under var och en av de tre senaste månaderna branschvis.
