TABELLREDOVISNING

I tabell 1a redovisas månatliga indextal från januari 1970 till oktober 1973 för industrins leveranser branschvis.

I tabell 1b redovisas exportandelen av leveranserna från januari 1971 till oktober 1973 i procent.

I tabell 2a redovisas månatliga indextal från januari 1970 till oktober 1973 för industrins orderingång branschvis.

I tabell 2b redovisas exportandelen av orderingången från januari 1971 till oktober 1973 i procent.

I tabell 3a redovisas månatliga indextal från 1970-01-31 till 1973-10-31 för industrins orderstock vid varje månads utgång branschvis.

I tabell 3b redovisas exportandelen av orderstocken från 1972-01-31 till 1973-10-31 i procent.

I tabell 4 redovisas orderstockens varaktighet i antal leveransmånader. Leveranserna under de kommande månaderna antas härvid vara lika med leveranserna samma månader ett år tidigare multiplicerat med en omräkningsfaktor. Denna omräkningsfaktor erhålls genom att leveransvärdet under de närmaste gångna tre månaderna divideras med leveransvärdet för samma period ett år tidigare.

Denna omräkningsfaktor används för att någorlunda korrigera för trenden i leveransutvecklingen.

I tabell 5 redovisas det uppräknade värdet av de imputerade uppgifterna i procent av det totala uppräknade värdet för leveranser, orderingång och orderstock under var och en av de tre senaste månaderna branschvis.

Fr o m SM I 1973:14 har några industrigrupper fått nya benämningar, vilka överensstämmer med de som används i Meddelanden i samordningsfrågor 1969:8 benämnt Standard för svensk näringsgrensindelning (SNI).
